Luke's Loving Heart

A Tribute Song

Intro - piano, acoustic guitar

Verse 1

I remember when you first arrived, a sight that made me smile
A little Yorkie bundle, wrapped up for a while
In your blue blanket, a tiny form so neat
A cozy wonder, oh so small and sweet
My uncle brought you, a gift beyond compare
A tiny treasure, banishing all care
From that first moment, my heart knew it was true
A special bond was forming, just for me and you.

Chorus

Oh, Luke, my dear companion, eleven years have flown
Every single day with you, a love that's truly grown
You fill my world with wonder, a joy that knows no end
Luke, my heart's true comfort, my very best friend.

Verse 2

The best part of my day is when I walk through the door
You run to greet me, wanting nothing more
Than to leap into my arms, a happy, warm embrace
That loving hug of yours, puts a smile upon my face
A happy bark, a wagging tail, a joy I can't deny
My furry shadow follows, beneath the open sky.
You make each moment brighter, with every playful start
You've always held a special place, deep within my heart.

Chorus

Oh, Luke, my dear companion, eleven years have flown
Every single day with you, a love that's truly grown
You fill my world with wonder, a joy that knows no end
Luke, my heart's true comfort, my very best friend.

Luke's Loving Heart (continued)

We love to dance together, to our favorite Christmas song
The rhythm guides our steps, where we both belong
I love you, Lukie boy, my special, cherished friend
On these sweet melodies, our happy moments blend.

Instrumental - piano, strings

Final Chorus

Oh, Luke, my dear companion, eleven years have flown
Every single day with you, a love that's truly grown
You fill my world with wonder, a joy that knows no end
Luke, my heart's true comfort, my very best friend.

Outro

You love to play with your worm, a funny, little game
And when we dance together, it's never quite the same
My unique Lukie boy, with a spirit bright and free
Always playing, always dancing, right here next to me.

Outro - guitar fade
